 APPROXIMATE
 INFERRED
ALTERATION
 DEFINITE
 APPROXIMATE
 INFERRED
 H.S. = No Exposure

ALTERATION
 Argillic alteration
 Quartz / Sulphide
 Tourmaline nodules

ROCK TYPES
 Fine grained 'white' granite
 Coarse grained 'red' granite

Major lineaments (approximate)

NOTE: Hole depths are anticipated to be between 25 & 60m. The proposed holes south & east of the workings are designed to test possible buried extensions of the tabular mineralization shallowly.
