	DEPT. OF MINES			EXTL
FILE No.	8324/85			

Dear Sir,

RELINQUISHMENT REPORT - EL29/80

The areas relinquished from the above exploration licence comprise Tertiary basalt cover and Tertiary/Quaternary alluvials.

Some of the areas have been field inspected and found to be not prospective for dolomitic or quartitic deposits. Extrapolation from the inspection sites, utilizing the Smithton Geological Map, has led to the relinquishment of nearly all of the basalt and alluvial cover.

None of the samples collected were considered worthy of assaying.

Yours faithfully,
MINERAL HOLDINGS AUSTRALIA PTY.LTD.

NEIL M. THOMAS
 CHAIRMAN
