ROSNY PARK TAS 7018

Attention: Mr. P. Wrigley

89-2944

Dear Sir,

Subject: Exploration Licences 39/87, 40/87, 41/87
and 43/87 - Relinquishment Report

Bach Holdings Pty. Ltd. and Minproc Mining (Tasmania) Pty. Ltd. have been the holders of the above exploration licences for the year ended 21.3.89.

During the currency of these licences, airphoto interpretation and reconnaissance exploration was carried out in the prospective coastal areas extending from Low Head in the west to Musselroe Point in the east. As a result of the work carried out during that period it is possible to delineate areas of each licence which are no longer considered prospective for concentrations of detrital minerals in coastal shoreline depositional sequences. These non-prospective areas are dominated by hard rock basement outcrops, or thin veneers of a weathered material, resulting from breakdown of the basement, or minor alluvial deposits.

No work during the period was carried out in the areas to be relinquished.

Yours faithfully,

Graham Lee
