WORKS UNDERTAKEN 1989-1990 \_\_\_\_\_

Owing to a clerical error the drilling program was outside of E/L 94/87 boundary in the Dillons creek Anomaly.

EVALAST MINERAL & MINING did not hold a license for this area. No major works as stated in our exploration programme proposed in our 1988-89 report was carried out.

As our 1988-89 core samples showed this area had potential an application for an extension of 6 square kilometers was taken out this has been approved and granted.

Works carried out were of manual labor divining and panning refer map no 2A

PARTIAL RELINQUISHMENT of E/L 94/87 \_\_\_\_\_

SHORTS HILL

SHERWOOD HILL

CHICKS PERCH

An area of 8 SKM.

This area contains light scrub to heavy timber areas and would be hard to comply with environmental standards. A panning and divining programme was carried out in various water courses and re-enteries in the above area our methods indicate that there is no potential. Several kilometers west of the lease divining showed an area of potential.

EXPLORATION PROGRAMME PROPOSED \_\_\_\_\_

Having DILLONS CREEK now included in E/L 94/78 will enable more and intensive testing of the anomalies divined by J. & H. Lazarus

1. Conduct airtrack or R A B drilling starting a point 50 metres grid North of PT- 89 - 1 and 2. covering areas as defined by divining
2. Sample core sections at 1 metre intervals for petrographic studies.
3. L38 best drill core and geochemical samples.
4. Assay for arsenic and fire assay all geochemical and drill core samples.

This expence list does not include  
720 man hours of own staff  
Travel 5754km & 40c km.
