EVALAST MINERALS & MINING

RELINQUISHED AREA of 94\87 PELVERATA

8 Sk.

As our methods for finding mineral locations are by the way of divining. The areas of :

CHICKS PERCH

SHERWOODS HILL

SHORTS HILL

Were included in E.L. 94\87 this area consists of pasture light timber and dense scrub with timber with some steep slopes.

On the western side of this ridge line 7 areas were investigated by panning.

Site 1. Grid 079369 Skinners creek. Samples predominately JURASSIC Dolerite with some quartz sand no indication of Au.

Site 2. Grid 073359 unnamed watercourse. Samples predominantly Dolerite no indication.

- Site 3. Grid 073352
- Site 4. Grid 067348
- Site 5. Grid 071347
- Site 6. Grid 067346
- Site 7. Grid 070342

----- All areas predominately Dolerite no indication.

This area of 8sk. was also covered by our divining with out any indication the same way as in the Dillins Creek area. This area appears to to be mainly dolerite except for a section of Grid 0734 which has medium grained sandstone, steep slopes with heavy scrub and timber cover.
