EXPLORATION LICENCE 37/82EXPLORATION EXPENDITURE
PERIOD 1-5-90 to 1-4-91

Mining Lease 8M/90 falls within EL 37/82. As significant exploration has been conducted within ML 8m/90 during the past licence term, approval was sought and received, to assign exploration expenditure on ML 8M/90 to EL 37/82. (see attached correspondence)

The following details that expenditure which was incurred by the "Brookside J.V." between Aberfoyle Resources Limited and H.D.Nolan.

EXPLORATION EXPENDITURE	EL 37/82 (ML 8M/90)
geology.....	\$31400
geochemistry.....	32460
geophysics.....	7200
petrology.....	4250
survey.....	9400
access.....	1700
drilling.....	35900
tech.services & other.....	10600
administration.....	13300
TOTAL.....	<u>146210</u>

23rd October, 1990

Dear sir,

EXPLORATION LICENCE 37/82 (LONG-BACK)

Mineral Lease 8M/90 is held by Amatek Limited in trust for H.D. Nolan. Terms of this agreement entitle Nolan to explore and exploit within this lease for minerals other than silica.

Over the past fifteen months exploration to a value in excess of \$120,000 has been conducted within this mineral lease under an Aberfoyle - Nolan joint venture. (The Brookside J.V).

The results of this exploration within the lease has not been formally reported to the Division of Mines, nor has the expenditure been allocated to any tenement.

As this lease falls within EL 37/82 (see attached map) we seek your consent to report this exploration and assign this expenditure to EL 37/82. This will enable us to meet licence performance requirements and maintain EL 37/82 in good standing for the current 1990/91 season.

Should this arrangement meet with your approval we shall provide a complete report on this exploration upon application for licence renewal or surrender in March 1991.

Yours faithfully,

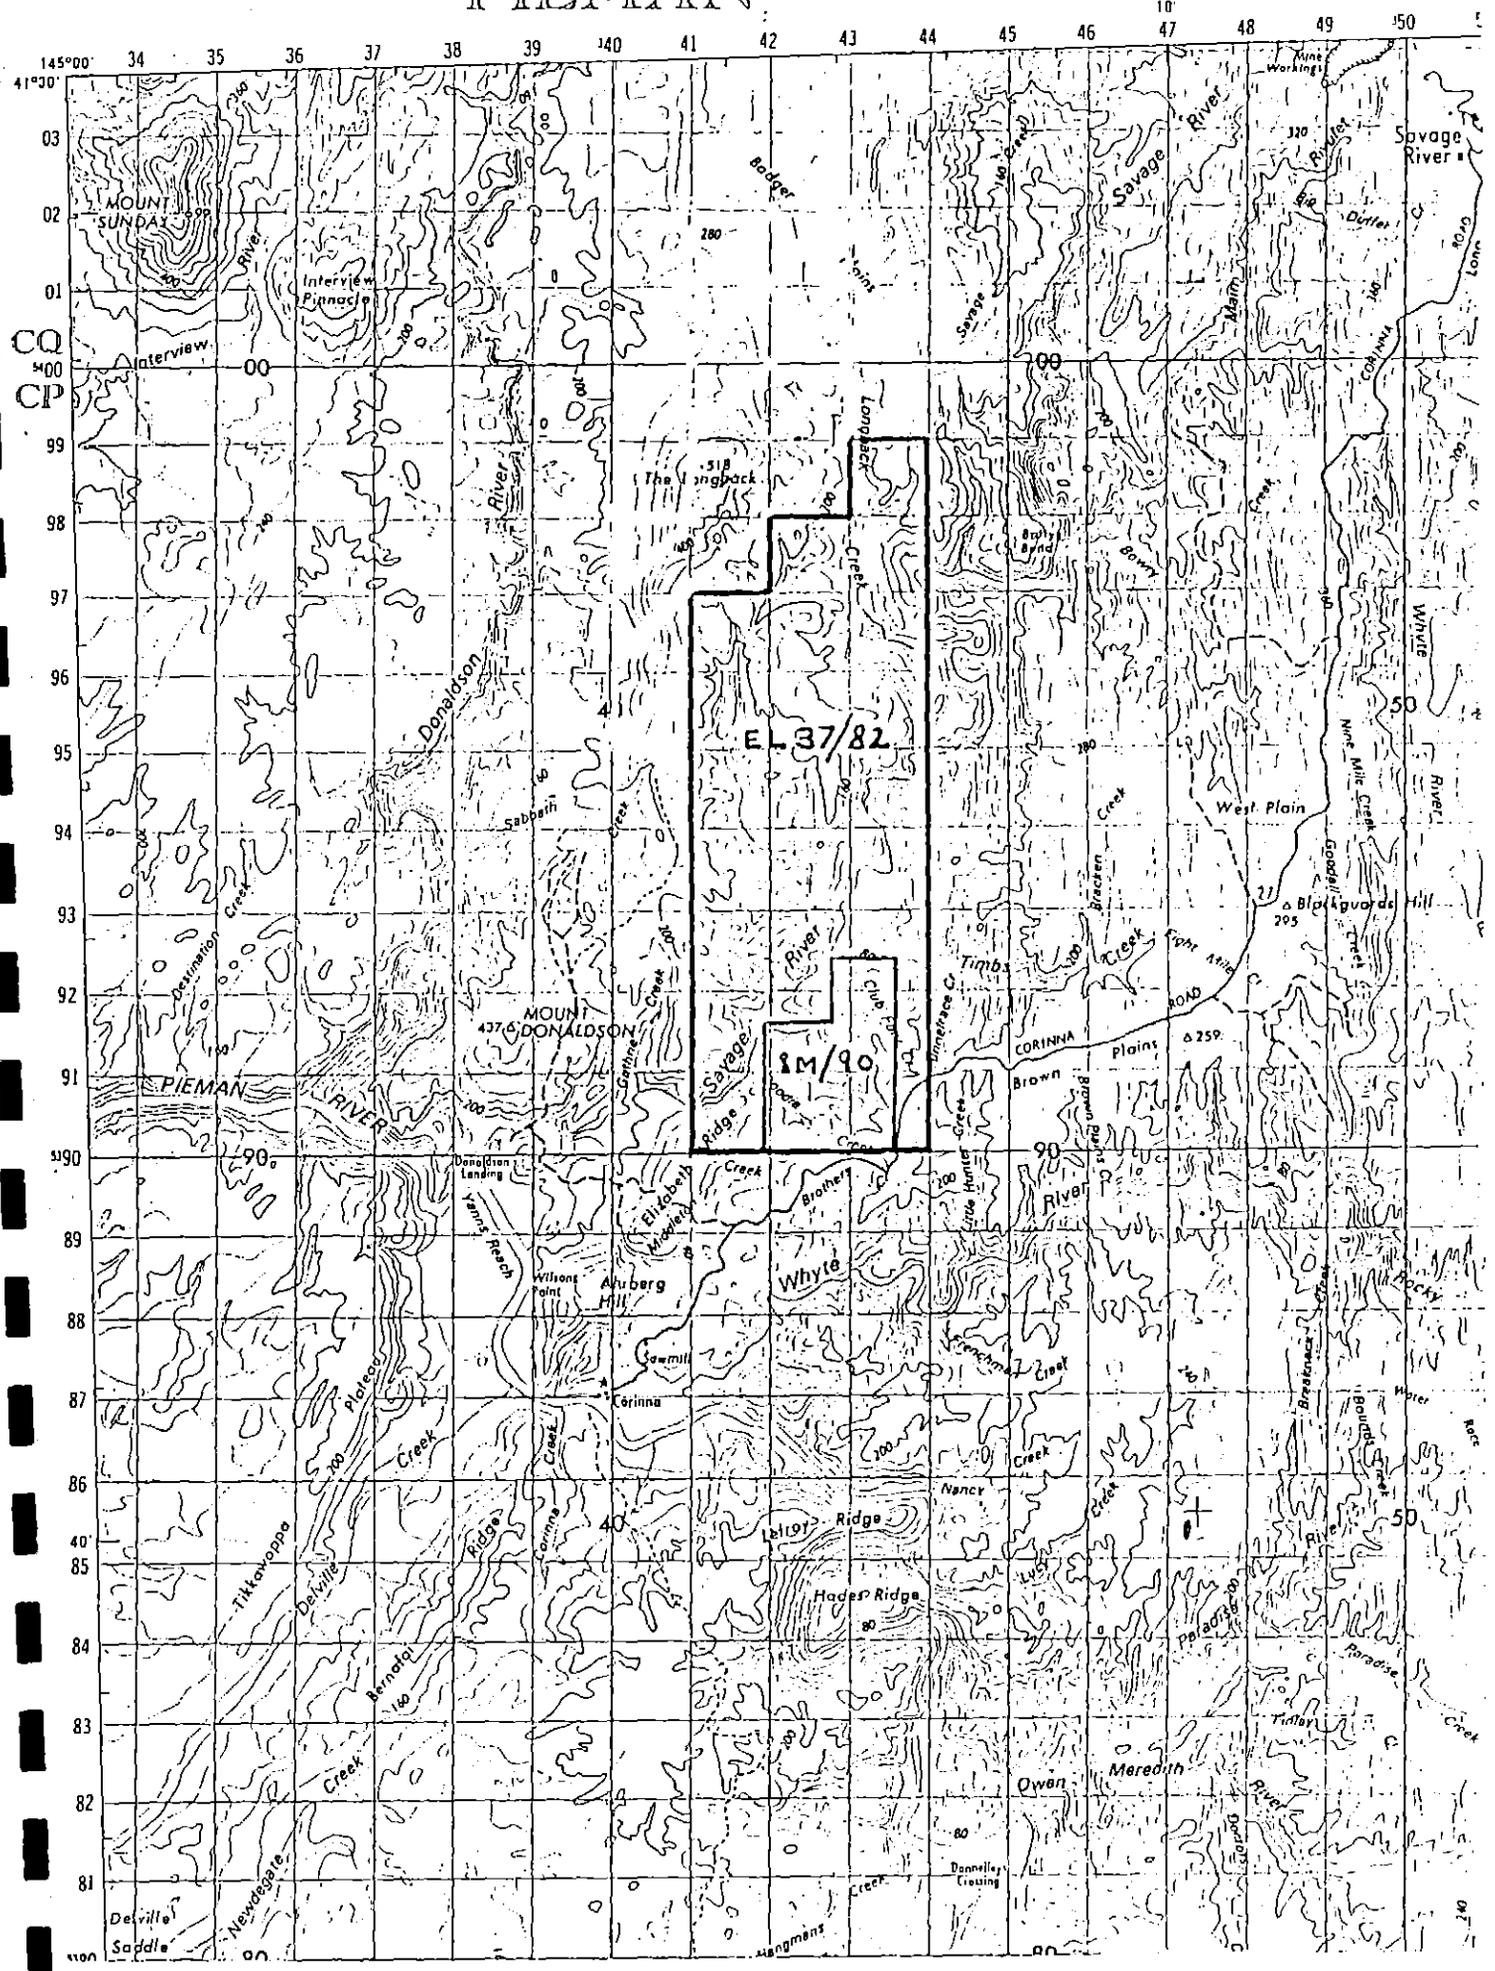

HUGH NOLAN.

PO Box 77
SORELL TAS 7172

Dear Sir,

MINERAL EXPLORATION LICENCE 37/82 - THE LONGBACK

Your letter of 23 October has been considered by Dr D. Duncan, the Deputy Chief Geologist.

As you indicated, your EL 37/82 shares northern, eastern and western boundaries with mining lease 8M/90 which is held by Amatek under an arrangement with you. That arrangement entitles you to explore and extract minerals other than silica within the mining lease.

In your letter it was stated that exploration worth more than \$120,000 had been conducted on ML 8M/90 during the past 15 months under an Aberfoyle-Nolan joint venture. You also sought approval of the following (given that EL 37/82 adjoins ML 8M/90 on three sides):

- . to assign exploration expenditure on ML 8M/90 to EL 37/82.
- . to provide an exploration report on the work carried out and to submit it under the heading EL 37/82.

The Division of Mines is agreeable to your proposals providing adequate reports and full details of exploration expenditure are supplied in the near future.

Yours faithfully,

J.G. Oakes
EXECUTIVE OFFICER
