N = 65

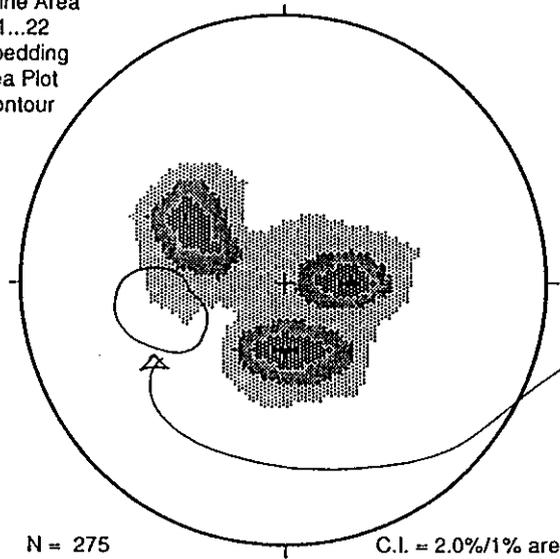

C.I. = 2.0%/1% area

Quarry in Cue River Shale,
near Tailings Dam Wall.

This site crosses an
F2 fold axis and falls
largely on the S limb of
an F1 ~~ax~~ structure.

Note that orientations
of beds on other side
of dam all fall in this
area.

Hellyer Mine Area
Location 1...22
Poles to bedding
Equal Area Plot
% area contour

N = 275

C.I. = 2.0%/1% area

It is not clear why
the N limbs of F1
are not preserved on
the F2 East limbs.
