EXPLORATION LICENCE 11/91

RELINQUISHMENT REPORT FOR 34 sq.Kms.to be excised from the above

Prior to the application for the above licence, reports of known coal exploration and water boring by Mines Dept. and others were sought from departmental files.

It was hoped to thereby exclude unprospective areas from the licence area. Unfortunately one crucial borehole was not disclosed until after the first rotary hole was drilled by Cornwall.

Had the existence of Kempton DDH 1 been known a considerable reduction in the area of application would have been possible.

The area now to be relinquished is considered to be unprospective on the basis of information in Kempton No 1.

SEE ATTACHED PLAN.....
