

**LEGEND**

- |   |  |   |                                |
|---|--|---|--------------------------------|
|  | Areas of low resistivity               |  | Induced polarization responses |
|  | Areas of high resistivity              |  | Magnetic lows                  |
|  | Areas of high chargeability background |  | Magnetic highs                 |
|  | Areas of abnormally low chargeability  |  | Possible faults                |
|  | Areas of high magnetic background      |   |                                |
