

LITHOLOGY		MINERAL	
CLAY Dark grey to black. Minor Quartz fragments.		Up to 5% Pyrite.	
CLAY Brown to black. OVERBURDEN?			
CLAY Khaki, minor Quartz and silicified corals.		Up to 10% Pyrite.	
CLAY Black to grey, slightly carbonaceous. Trace of fossils.			Ironstone fragments.
CLAY Light grey, calcareous.		Up to 20% Pyrite.	
CLAY Light khaki, silty. Minor Siltstone fragments.		Up to 5% Sphalerite. Up to 1% Galena.	
CLAY Khaki-green, poorly bedded, rare fossils, possible BRECCIA texture.			

EASTINGS 60300-60526	SAMPLE INTERVAL 2 m	SAMPLED BY G. KARY, L. MARTIN, L. WALSH.	DATE 6-2-'84 to 10-2-'84	AZIMUTH Grid E./089°A.M.G.	TOTAL LENGTH 226 m	ELECTROLYTIC ZINC CO. of A'ASIA LTD.	
MYRTLE GRID LEGEND . — . — . Pb x — — — — x Zn o — — — — o Ag PY = Pyrite SP = Sphalerite GN = Galena						PROJECT: E.L. 4/78 ZEEHAN TAS.	
						PURPOSE OF COSTEAN To test anomalous Pb-Zn geochemistry from a Jacro auger bedrock sampling program. Assays up to 4.1% Zn, 1.05% Pb.	
SCALE: 1:500		SURVEY: G. KARY		REVISED:
