PARTIAL RELINQUISHMENT REPORT FOR THE
NORTHERN PART OF EL 59/94 MT AGNEW 1995-96 -
LANE D C

TABLE OF CONTENTS

1. LIST OF FIGURES
2. TENEMENT INFORMATION
3. EXPLORATION PHILOSOPHY
4. SUMMARY OF WORK COMPLETED 1995-96
5. CONCLUSIONS
6. MAP

1. LIST OF FIGURES

1. Map showing area to be relinquished

2. TENEMENT INFORMATION

EL 59/94 was issued to David Lane on February 17, 1995. A plan of the Licence area and locality map is shown in Figure 1.

The Licence area comprises 36 square kilometres of unoccupied Crown Land and State Forest - Multiple Use Forest Land.

3. EXPLORATION PHILOSOPHY

My exploration philosophy is to search for small tonnage, high grade deposits, with emphasis placed on alternative targets and low environmental impact, labour intensive operations. Exploration is field based, as opposed to remote sensing.

In the area covered by EL 59/94, the emphasis is on tin-polymetallic sulphide mineralisation as located at Sweeney's Mine and Anomalies 1 and 4, Agnew Grid.

4. SUMMARY OF WORK COMPLETED

Granite and North West Anomalies

A reconnaissance survey was made to this area. The area is remote and rugged. No significant mineralisation was located. Full details are given in the annual report for EL 59/94.

5. CONCLUSIONS

As the area where the North West and Granite Anomalies are located is remote and inaccessible, it is proposed to relinquish this northern part of the licence to enable work to be concentrated on Sweeney's Mine, and Anomalies 1 and 4.

6. MAP SHOWING AREA TO BE RELINQUISHED.
