See folio 17	

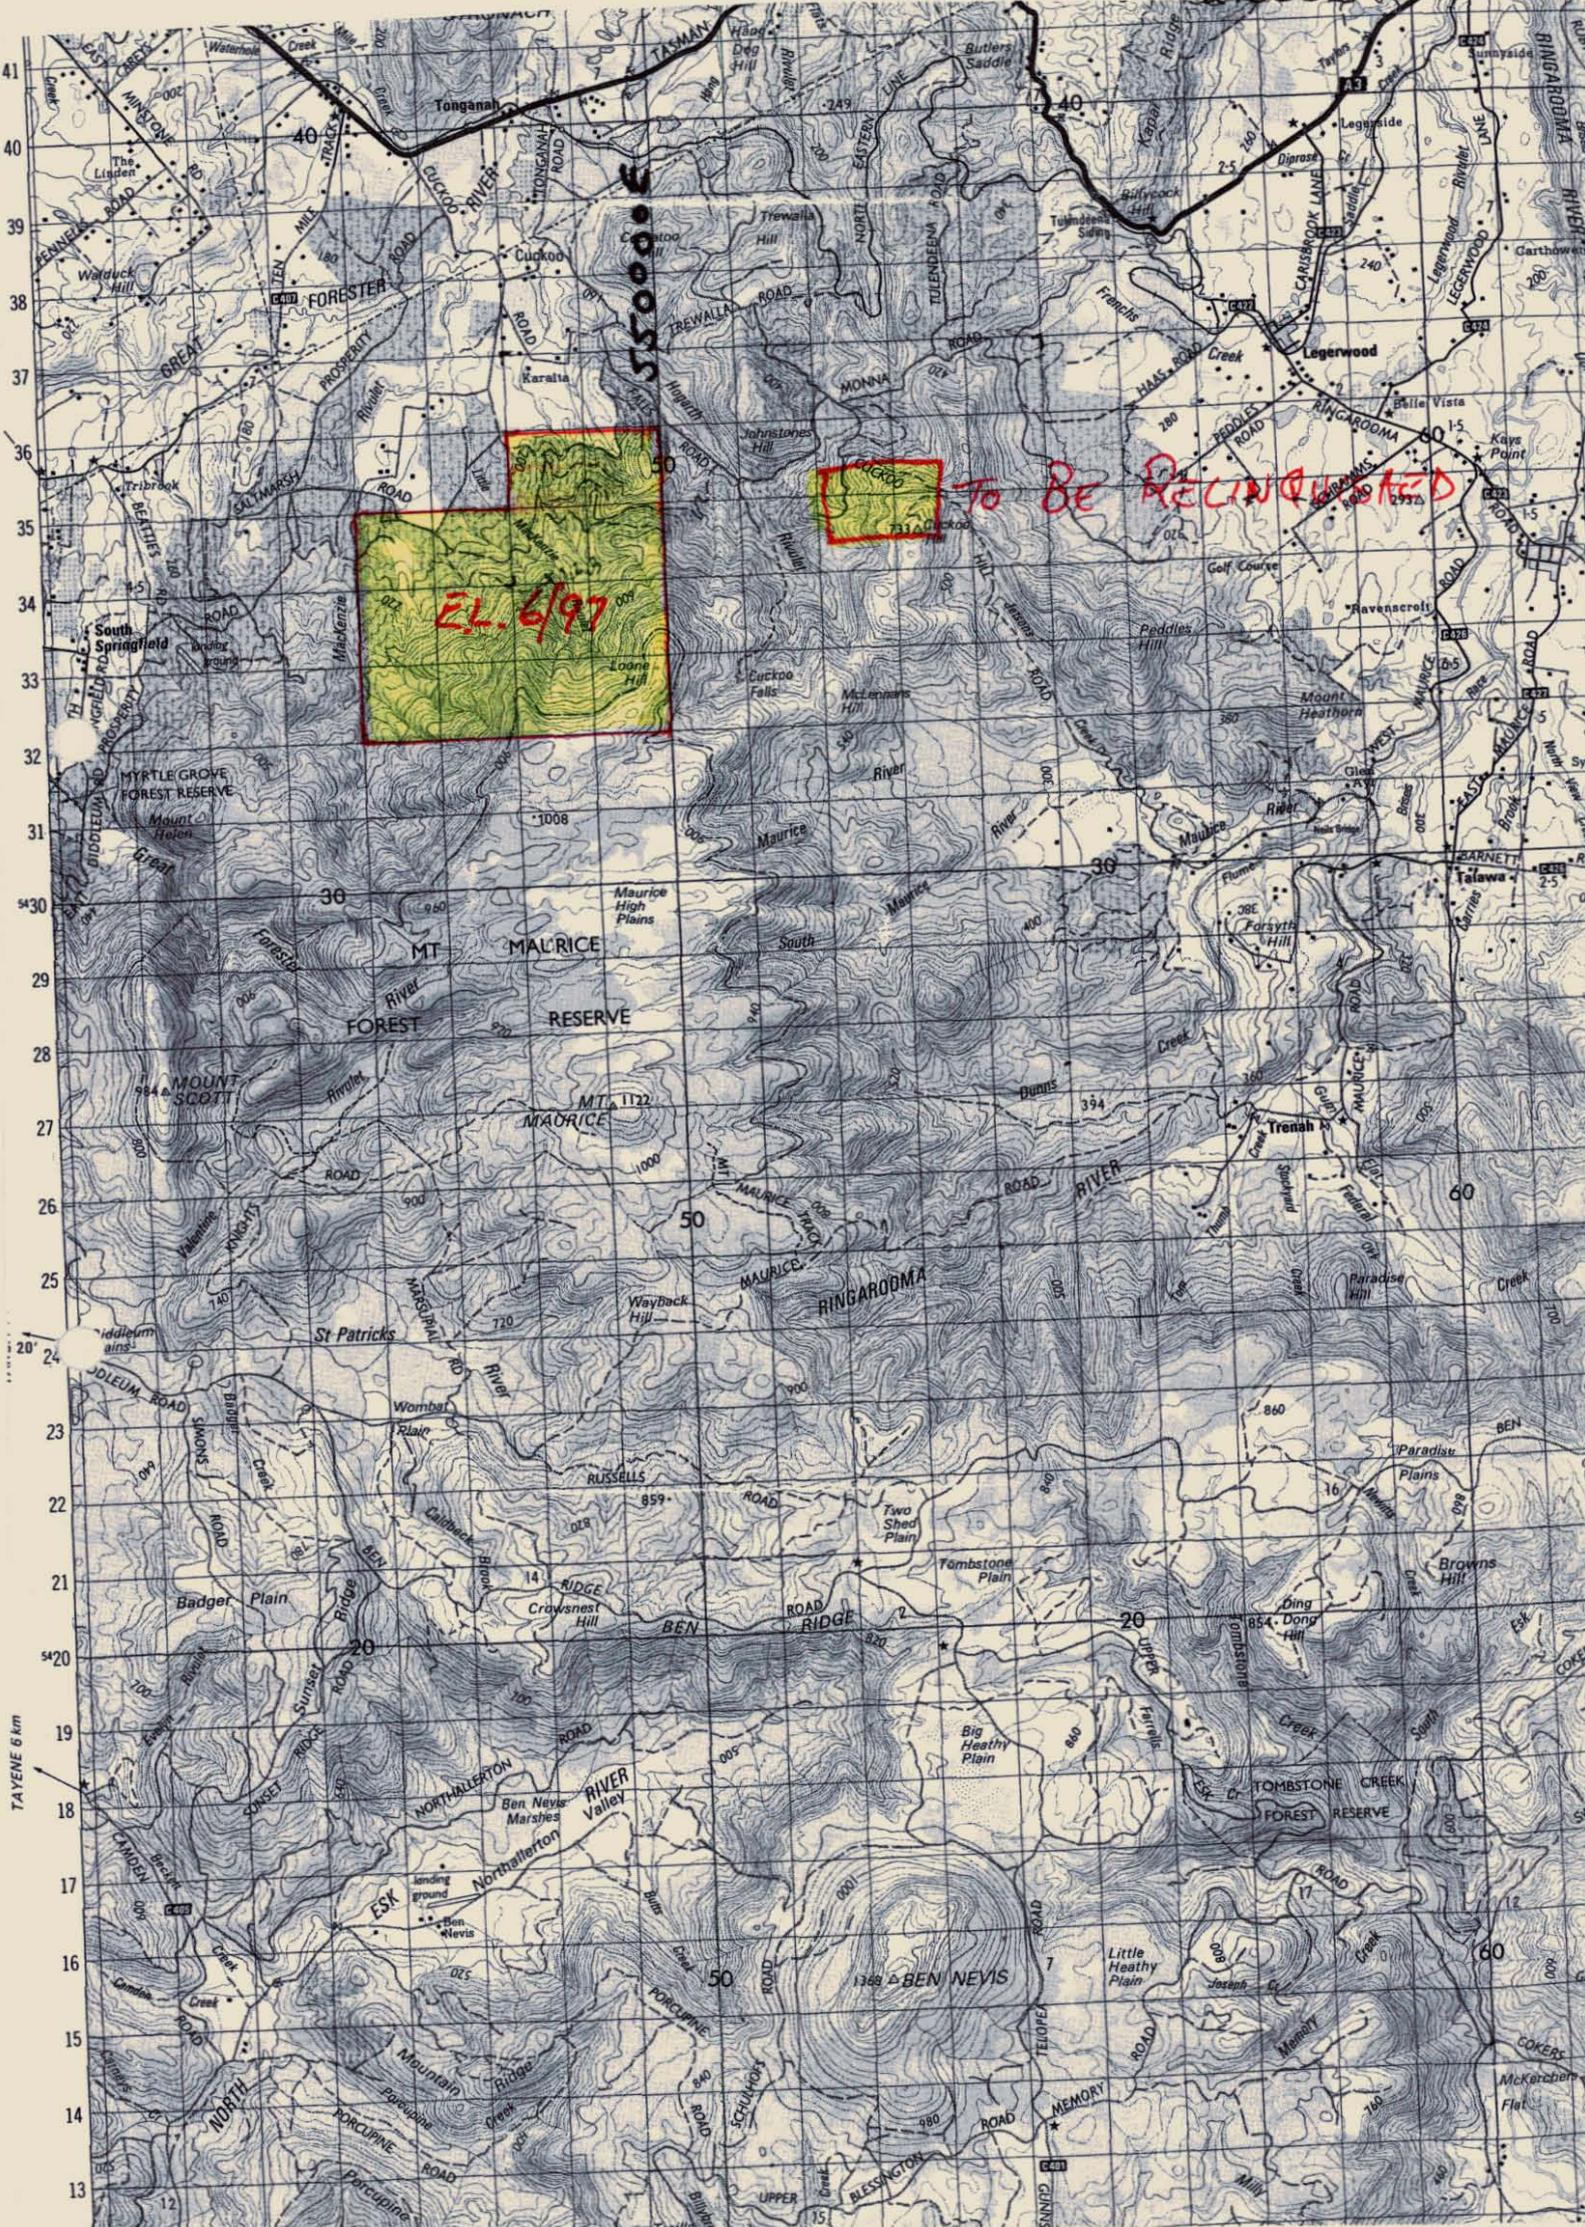

E.L. 6/97 covers an area of 14 km<sup>2</sup> in the District of Dorset in the vicinity of Cuckoo.

The country rock is devonian granodiorite.

The tenement was considered prospective for copper - porphy style deposits.

Following a reconnaissance ground inspection of the whole licence area, it was decided that this is unlikely.

As a result of this inspection, the total area of E.L. 6/97 is to be relinquished (see attached map).

EL. 6197
