INDEX TO ADJOINING SHEETS

about this map:
This highly detailed, topographic/Cadastral Map portrays land divisions, land uses, boundaries of Crown, Municipalities, Proclamation Towns and specific areas as determined by Crown authorities.
Access to further information about land divisions and their boundaries is available in the Land Information Bureau Centre by quoting the UTM reference.
Each map in this series covers an area of 10x20 kilometers and is available in the form of a map, or as a series of sheets. Enquiries or orders of this map should be obtained on the map or paper upon request from the Land Information Bureau Centre.

EDITION 1
NARACOOPA
2457
EDITION 1 1996

TASMANIA
1:25 000
SERIES

PRODUCTION: Land Information Bureau, Department of Environment and Land Management, Hobart, 1996.
ACCURACY: Horizontal: Not less than 90% of points of well defined detail are within 12.5 metres of their true positions at map scale.
Vertical: Not less than 90% of elevations are within 5 metres of their true elevations. This accuracy may not be achieved in areas of dense vegetation.
RELIABILITY: The information content of this map has been determined from aerial photography taken in Dec 1992 and verified by field inspection undertaken in Oct 1993. It contains as far as possible, information appropriate to the scale, the geographical locality, and the general purpose of this map.
NOMENCLATURE: Place names have been approved by the Nomenclature Board of Tasmania.
PUBLIC RIGHT OF WAY: Roads and tracks on this map do not necessarily indicate a public right of way.
REVISION: A five yearly revision cycle is intended for this series. Users noting errors and omissions are invited to write to the General Manager, Land Information Bureau, Department of Environment and Land Management, GPO Box 444, Hobart, Tasmania, 7001.

PROJECTION: Universal Transverse Mercator (UTM).
HORIZONTAL DATUM: Australian Geodetic Datum 1966.
VERTICAL DATUM: Australian Height Datum (Tasmanian) excepting offshore islands whose datum is mean sea level.
GRID: 1000 metre intervals of the Universal Transverse Mercator Grid, Zone 56 Australian Map Grid, Australian National Spheroid. Grid values are shown in M at the south west corner of the map.
CONTOUR INTERVAL: 10 metres with 50 metre index contours.
WORLD GEODETIC SYSTEM 1984: To convert co-ordinates from this system to Australian Geodetic Datum 1966, increase the value of latitude by 0.2 equivalent to 160 metres, and decrease the value of longitude by 4.4, equivalent to 105 metres. To obtain height, increase suitable heights by 2 metres.
MAGNETIC VARIATION: True, Grid and Magnetic North are shown diagrammatically for the centre of this map. Magnetic North is correct to 1996 and moves easterly about 0.11 every two years.

Residential area; Commercial buildings
Roads maintained for continuous public use
Other road
Other road with bridge
Vehicular track with gate
Walking track or horse trail with bridge
Railway with stations; Places entered in National Estate Register
Power transmission line with pylon positions
Building; Feature of historic or special interest; Ruin; Mine
Post office; Police station; Fire station; School

Caravan park; Camping ground; Public toilets
Disposal area; Water information centre; Cemetery
Picnic area; Trip station beacon; Spot elevation
Contour with value; Depression contour
Quarry, pit or open cut mine
Rock scree; Broken rocky surface
Dense forest; Medium forest
Low dense vegetation; Distinctive grass
Orchard; Pine plantation
Scrub, heath or sedge/land; Submerged trees

Swamp, perennial; intermittent
Windbreak
Wet area; Subject to flooding
Waterfall; Rapids
Indefinite shoreline or foreshore; Levee
Tidal rocks or ledge; Offshore rock
Navigation light or lighthouse; Exposed wreck
Sand; Tidal reef
Saline coastal flat; Tidal flats
Jetty; Launching ramp

SCALE 1:25 000
1 millimetre on this map represents 25 metres on the ground

BOUNDARIES shown on this map are NOT authoritative. For full particulars please consult the Land Titles Office and Registry of Deeds or the Office of the Surveyor General, Department of Environment and Land Management. Areas within proclaimed towns or less than two hectares may not be depicted. Boundaries of Crown land including 'openness' related to low water mark. To give a land parcel reference, quote the alpha numeric identifier e.g. 1604/P/M. To use this identifier to gain title valuation or survey references please consult Land Information Bureau's Land Information Cross-Reference System (LIRCS). Property and parcel boundaries are shown as at January 1996.

UNIVERSAL GRID REFERENCE
To give a standard reference to the nearest 100 metres:
1. State name and number of this map.
2. Locate your UTM grid line on the left of point and read large figures only within the top or bottom margin e.g. 53.
3. Locate your UTM grid line below the point and read large figures only within the left or right margin e.g. 75.
4. Estimate tenths from grid line to point e.g. 2.
SAMPLE POINT: 71 = PEARSHAPE 2456
To give full grid reference, prefix with Grid Zone Designation and 100 000 metre Square Identification letters e.g. 56SGP32798
