TASMANIAN CONSTRUCTION MATERIALS REGISTER

Serial No. 44(a) Grid Reference: 109 714 Map Sheet No 75

Name of Owner/Quarry:

Working Pit/Disused Pit/New Locality: Not worked 6 yrs +

Past Production: 1,500 m³ Estimated Reserves: 2,500 m³

Description of site: Sloping surface scrapings, (shallow) now sprinched with gum regrowth on upslope side of road.

Limits to expansion: Road, shallow depth of gravel.

Thickness of overburden: < 5 cm - stony sandy soils.

Sources of information: Rm Field: 2/8/78 Laboratory: Reference No.:

Sizing analysis: Date:

L.L. P.I. L.S. D.R.

Special tests:

Group Symbol (unified soil classification system):

Geological Description: grey Permian siltstone => angular gravel and grit with sand and clay. Bedrock exposed.

History: local use - on minor roads.

Remarks: Dimensions of Scraping.

Total length 200 m, Max width 40 m or width 30 m, max depth 1 m average depth .25m

Sampled.

TASMANIAN CONSTRUCTION MATERIALS REGISTER

Serial No. 44 (b) Grid Reference: 107 718 Map Sheet No 75

Name of Owner/Quarry: _____

Working Pit/Disused Pit/~~New~~ Locality: not worked for at least 2 years

Past Production: 500 m³ Estimated Reserves: 5,000 m³

Description of site: Surface scrapings on upslope side of road, in scrub and low forest. Reached by two overgrown tracks.

Limits to expansion: none laterally; bedrock at shallow depth.

Thickness of overburden: < 5cm stony soil
